

Our energies for a Better Life

Energy

Our energy management includes all aspects of carbon advice, including strategic technical and financial carbon planning, audits and project management, grants, funding and training. We can help assure carbon compliance to CRC, EPBD, EPCs, DECs, EU ETS and ISO 50001.

Bouygues Energies & Services offers clients undertaking energy projects, with project [design and installation](#) [1] of turnkey, renewable and low/zero carbon technologies including underwritten options.

Our [carbon performance contracting](#) [2] includes investment grade audits, project installation, funding and guaranteed performance. We are able to offer procurement and payment validation, risk mitigation, overpayment review and refund management.

Bouygues Energies & Services's clients also have access to [Hypervision](#) [2], its bespoke energy measurement and verification software tool.

In the area of [Smart Grid solutions](#) [2], Bouygues Energies & Services supplies, installs and commissions urban smart grid solutions, incorporating demand response payment.
