

Our energies for a Better Life

Consulting / Contracting

For highly demanding, complex, technically challenging projects where there is need for innovation and value creation, we provide industry leading consulting and contracting solutions delivered through a unique in house design and delivery model. Our flexible customer focused consulting and contracting solutions ensure the delivery of optimised asset capital and lifecycle strategies, resulting in investment programmes which deliver the highest return of investment from day one.

Bouygues Energies & Services are a market leader in the provision of fully integrated world class multidisciplinary design and delivery solutions with a unique in house delivery model, enabling us to build and enjoy long term and long lasting strategic **relationships** and **partnerships** with our customers.

As a true lifecycle partner operating within critical, high risk market sectors, we offer unparalleled [design and build solutions](#) [1] from conception to completion, with single point accountability, replacing risk with added value.

From specialist facilities through to innovative [process engineering](#) [2] and the provision of associated [critical controlled environments](#) [3], our staff are passionate about delivering your vision through the generation and realisation of robust, resilient and sustainable assets, services and facilities, with each project setting a new benchmark in performance standards and customer care.

With significant experience and track record in delivering some of the world's most innovative facilities on both greenfield and live operational brownfield sites, whether laboratory, development, demonstrator or industrial scale, we are the engineering solution partner of choice for high tech research and manufacturing, providing customised solutions to meet your specific needs.

Our services include:

- **Consulting Solutions** – Project management, Site Master planning/Investment Appraisal, Conceptual Design & Feasibility Studies, Detailed Design
- **Contracting Solutions** – Construction Design, Procurement, Installation & Construction, Commissioning & Validation, Training & Troubleshooting, Service & Maintenance/Facilities Management
- **Energy Solutions** – Auditing, Energy Performance Contracts, Alternative Energy Solutions
