

Our energies for a Better Life

Canada and the Middle East

Our objective is to deploy Bouygues Energies & Services's competencies in new geographies. We are present in countries outside of continental Europe and the United Kingdom. Our operations in each country respond to specific needs in complex, highly secure or prestigious environments where Bouygues Energies & Services's skill set can demonstrate unique and sustainable value. Our integrated approach is well adapted to projects that are particularly sensitive, have a high degree of risk transfer, a high rate of growth and incorporate change management or energy optimisation.

A leading provider of [Total FM](#) [1] services in Public Private Partnership (PPP or P3) environments. In addition to service delivery, our approach in Canada is also highly integrated and includes lifecycle management and project company management services. Our projects and services in Canada are listed below.

Part of a consortium, Bouygues Energies & Services is contracted to design, build, finance and operate the **Jim Pattison Outpatient and Surgery Centre** in Surrey, British Columbia. Our involvement started at the bid phase where we developed a whole life approach to design, optimising the physical plant to minimise cost and risk over the entire operation. Our scope of service over the thirty year operating period includes [Hard FM](#) [2], lifecycle and helpdesk services together with domestic, waste management and car parking services. This highly integrated approach has allowed the client, Fraser Health Authority, to optimise patient outcomes by focusing on its core purpose in this innovative world-class facility.

Bouygues Energies & Services Canada is also a leading provider of services in highly secure environments. As

part of a PPP consortium, we provide total FM services, lifecycle, and project company management services for

the E-Division headquarters project for the Royal Canadian Mounted Police, Canada's national police force in

Surrey, British Columbia. This innovative facility of 76,000 square metres will house up to 3,000 detachment

members and civilian staff previously located on 24 sites spread out in the region.

Bouygues Energies & Services Canada delivers integrated total FM services, including facilities and plant

maintenance, cleaning, waste management, information management services (CMMS, BMS and energy

management systems) and food services. The building is constructed to LEED Gold standard and will be managed

to BOMA BEST, the leading environmental certification programme.

Plan Group

Bouygues Energies & Services has acquired a majority shareholding in [Plan Group \[3\]](#), a Canadian

company specialising in mechanical and electrical engineering (design, installation, maintenance

and technical services, building automation systems and network infrastructure).

[Plan Group \[3\]](#) is based in Toronto, Ontario, and also has offices in Ottawa, Montreal and Vancouver. It recorded sales of \$Can 361 million (approximately €242 million) in 2013, and employs approximately 1,700 people. Bouygues Energies & Services acquired an 85% stake in Plan Group. The current management team remains unchanged and retains a 15% shareholding in the company. For more information please visit: <http://www.bouygues-es.ca> [4]

Ecovert FM Kuwait (EFMK)

Established in 2008, Ecovert FM Kuwait is a joint venture with leading local partners. Initially founded to provide total FM services to the Al Hamra tower, the world's 11th tallest building, EFMK has since expanded to other iconic projects and now provides services to a wide range of private and public sector clients in retail, commercial, governmental, and airport environments. The Kuwait team of around 500 Ecovert staff is led by a seasoned team of managers and engineers with extensive experience in healthcare and military environments.

Other Countries

Bouygues Energies & Services International provides FM support and advisory services to PPP projects around the world. Typical projects include the new airports in Cyprus, various civic and university buildings in South Africa and leisure, sports and civic buildings in Singapore.

Bouygues Energies & Services International can provide extensive advisory services around the world leveraging the Group's practical experience in TFM and PPP projects and recognised know-how in energy management and optimisation.
